## Product Overview

Through the use of MPS' innovative single-step assembly process, our modules have superior performance and inherent reliability by eliminating unnecessary assembly steps and minimizing external components. They are easy to use and rework due to our standard QFN packaging, which eliminates some of the disadvantages that may have been associated with BGA or NDY packages. As a result, MPS modules are also inherently more cost effective.

- **Benefits**
  - Ease of design
  - Simple manufacturing
  - Small footprint
  - High performance
  - Cost effective

Lead-frame with all components (regulator IC, inductor, and other passives) integrated onto the same lead frame. Utilizing standard IC assembly process, packaging, and test equipment to cost effectively mass produce. Our modules can be easily implemented during system circuit development; they are easier to test, solder, and rework; No expensive Optical alignment BGA rework machines and X-ray inspection required.

### Schematics (Typical)

- Solution footprint: 52mm<sup>2</sup>
- External Components: 7
- Efficiency: 88% (Vin=12V, Vout=3.3V, Io=0.4A)

### Layout guidelines

Top Layer

Bottom Layer

### Schematics (Typical)

- Solution footprint: 52mm<sup>2</sup>
- External Components: 7
- Efficiency: 89% (Vin=12V, Vout=3.3V, Io=1A)

### Layout guidelines

Top Layer

Bottom Layer

### Schematics (Typical)

- Solution footprint: 52mm<sup>2</sup>
- External Components: 7
- Efficiency: 82% ( $V_{in}=12V$ ,  $V_{out}=1.8V$ ,  $I_o=1A$ )

## Layout guidelines

### Schematics (Typical)

- Solution footprint:  $19\text{mm}^2$
- External Components: 5

### Layout guidelines

### Schematics (Typical)

### Layout guidelines

- For Rails:  $V_{REF}$
- Solution footprint:  $4.5\text{mm}^2$
- External Components: 3

- Maximize coverage of ZU+ family with wide choice of products from MPS
- Use of integrated modules for simplified design and PCB layout
- High Efficiency
- Cost effective
- Smallest Solution Size
- Minimum External Components
- Fast Transient Response and minimum ripple
- Modules are fully tested

Thank you
